Rodrigo segundo o Textar tem que atualizar o Kernel e nvidia ddrivers.
Segue texto.

The following kernels have been updated to close vulnerabilities associated with the Meltdown/Spectre exploits.
All previous kernels are considered insecure/unsecure.

kernel-4.4.110-pclos1-1-1pclos2018.x86_64.rpm

kernel-4.9.75-pclos1-1-1pclos2018.x86_64.rpm

kernel-4.14.12-pclos1-1-1pclos2018.x86_64.rpm

In addition to the updated kernels the following Nvidia drivers have been updated to work with the updated kernels.

dkms-nvidia304-304.137-3pclos2018.x86_64.rpm

dkms-nvidia340-340.104-3pclos2018.x86_64.rpm

dkms-nvidia-current-384.111-1pclos2018.x86_64.rpm

Please install one of the updated kernels and nvidia drivers if applicable as soon as they show up in the regular software repositories.
