Pessoal,

nova versão do PCLinuxOS "KDE Full Monty" lançada!

"A new maintenance release of the PCLinuxOS "KDE Full Monty" edition, the project's Linux distribution with a special desktop layout and a large number of applications, is ready: "PCLinuxOS KDE FullMonty 2012.09 is now available for download. This is a 32-bit DVD image which can also be installed on 64-bit computers. KDE FullMonty is a regular PCLinuxOS KDE installation with special desktop layout and many applications and drivers pre-installed. FullMonty applies a new concept: activity-focused virtual desktop layout, which is designed to address typical user needs and tasks. KDE FullMonty features: Linux kernel 3.2.18, KDE 4.8.3 with many applications; all kinds of drivers and applications to deal with any kind of external hardware, like cell-phones, scanners, printers, webcams, TVs, Bluetooth devices, iPods, radios, etc; six activity-focused virtual desktop layouts, each with task-related desktop launchers of popular applications. See the brief release announcement and read the more detailed product description's page for further info and screenshots. Download: pclinuxos-kde-fullmonty-2012.09.iso (3,986MB, MD5)".
