Amigos,

Dias atrás tive problemas de atualização no PCLinuxOS LXDE BR, mas entrando como root e com a ajuda do Ag. Smith, consegui resolver o problema.

Agora é no KDE 64 bits que estou travado. A última atualização não ficou 100% e nao consigo fazer coisas no terminal de root porque o usuário nao tem mais privilégios, e o root nao consegue também resolver! A atualizacao ficou incompleta??? O ícone de desktop na barra sumiu e tenho um X branco em um quadrado vermelho, no lugar dele.

No terminal, recebo isto (ver abaixo).

ALGUMA SUGESTAO??

```
