URL:

In case the plugin causes high cpu-usage, you can try this

(BTW, Linux Flash Player hardware acceleration is disabled starting with FP11):

create /etc/adobe/mms.cfg:

```
# Adobe player settings
```

```
AVHardwareDisable = 0
```

```
FullScreenDisable = 0
```

```
LocalFileReadDisable = 1
```

```
FileDownloadDisable = 1
```

```
FileUploadDisable = 1
```

```
LocalStorageLimit = 1
```

```
ThirdPartyStorage = 1
```

```
AssetCacheSize = 10
```

```
AutoUpdateDisable = 1
```

```
LegacyDomainMatching = 0
```

```
LocalFileLegacyAction = 0
```

```
AllowUserLocalTrust = 0
```

```
# DisableSockets = 1
```

```
OverrideGPUValidation = 1
```

```
EnableLinuxHWVideoDecode=1
```
